netventure sets standards in the development of innovative technologies and lets you experience TV in a completely new way. Virtual studios and real-time graphics make your production an exciting TV event for viewers.
VIRTUAL & AUGMENTED GRAPHICS

Looking to save space or money with a virtual studio? Wanting to enhance your production with augmented graphics? Or searching for new revenue streams with virtual advertising? For 12 years we have been pushing the boundaries of Vizrt Graphics Engines and tracking systems to create astonishing virtual studios and augmented reality graphics even in the most challenging environments.

OPERATORS

From a single studio day to an entire season, our professional team of certified Pro Viz Trio operators are able to provide a reliable all-round graphics operating service for your production on site.

HARDWARE & SOFTWARE RENTAL

Ranging from live graphics playout engines, control application software or tracking systems for virtual studios or augmented reality graphics, our compact and safely packed rental kits are available for single events or complete seasons. Our kits include everything from cables to the high end Vizrt graphics system guaranteeing the highest production quality.

TRAINING

From one-on-one training to group workshops, our Vizrt experts and certified operators can help you get the expertise you need to uncover the full potential of your Vizrt systems. Take full advantage of your Vizrt systems regardless of your current knowledge level.

SOFTWARE SOLUTIONS & DATA INTEGRATION

Statistics and real-time data such as voter polling, sports scores, and financial statistics are an integral part of many productions. From data driven graphics to custom control applications, we provide robust data integration services and user friendly software solutions that meet your individual workflow needs.

CONSULTING & SUPPORT

Planning an upgrade or installing a new Vizrt infrastructure? Our expert consultants can support you in choosing the right hardware and software within your budget. Our team of technical experts can also assist you during installation, support & maintenance of your Vizrt systems.

For almost 20 years we have provided live broadcast graphics for international sporting events, live shows and entertainment productions all around the world. With our experienced team we develop innovative solutions to meet all your production needs. From our 6 locations in Europe, we offer you a high-quality and reliable end-to-end service and solutions for your productions worldwide.

CREATIVE SERVICES

Launching or re-branding your channel? Getting ready to cover a sporting event? Or maybe there's a general election or awards show on the horizon. Combining technology and creativity our design team focuses on delivering new and innovative graphic concepts that are eye-catching and unique.
SOCIAL MEDIA

In the new media landscape viewer engagement has ecome a crucial part of any live event or broadcast. Integrate social media content into any live graphics. With our editorial tools you will be able to search, filter and moderate content to be displayed anywhere from a ticker or lower third to video walls or augmented graphics.

LIVE STREAMING

Online viewing is on the rise, reach a larger audience by streaming your live event online. Our experienced team can provide a smooth implementation and end-to-end solution for streaming your live production or event online.

Development of the real-time virtual ghost plane and augmented graphics for the Red Bull Air Race Series
